*(2 respondents replied that Shower Glove covers everything that the Shower Mitt covers- cut the glove to make it fit)

PATIENT AND NURSE COMMENTS

Patient Feedback

“Easy to Use”
“Not being swallowed up”
“Liked how it fit”

Nurse Feedback

“Patients like it”
“I really like it”
“Patient can move fingers more”

WHY THE SHOWER MITT SHOULD BE ADDED IN ADDITION TO THE SHOWER GLOVE

- Florida Hospital Nurses Requested a Shorter Version to cover areas below the forearm
- Shower Glove + Shower Mitt Protect a Larger Population of Patients
- Protects finger and hand dressings that will not fit in glove
- Better fit for smaller sized patients including pediatrics
- Saves Time – No Cutting or Improvising
- Improves Patient Experience- Patients Prefer to cover only the area that needs to be protected
- Standard Product made specifically for protecting any area below the forearm
